

Please do not allow any furthur consolidation of the media industry. Americans do not want our media industry to end up like the software industry, where one company has monopoly power over the whole industry. Democracy is based on the idea of one man, one vote. When one company has control over the whole radio or TV bandwidth of a given area, this is no longer an equal democratic situation. Instead of "one man, one vote", it becomes, "one company has all the votes".

Please do not allow furthur consolidation in the media industry.
